Subject: example of infrastrucur (dw/ww) table from previous events Infrastructure Facilities Within Impacted Areas

All – we need to include a table similar to this in the update and upcoming sitreps. Bryant is reaching out to START to compile this information based on the entries into RM from the water team in Austin.

Infrastructure Facilities Within Impacted Areas					
Facilities	Sites Identified	Sites Assessed	Requiring Assessment ³	Operational	Non-Operational
POTW – LA (Statewide) ¹	317	312	5	299	13
POTW – TX ²	70	70	0	70	0
Industrial Wastewater ⁴	899	311	588	260	51
Total Facilities	1286	693	593	619	64

1. The data for LA is statewide, not only in the FEMA declared parishes as in previous SITREPS.
2. This is the status of all major and minor NPDES permitted POTWS in the declared FEMA assistance zones.
3. This column represents facilities that teams have been unable to contact or otherwise determine status.
4. Updated numbers are not available. The RRC and IMT will work with the State to update this table.
